

RTD Informational Passage Review Tool

By: Marjorie Wine
Alexander Hoffman

The RTD (Rigorous Test Development) project is an attempt to build a professionalized content development practice that focuses on individual item quality, particularly by leaning into the importance of validity throughout the content development process. It assumes that content development professionals develop professional judgment that can be raised, honed and calibrated by providing frameworks and clarifying expectations in ways that account for the constraints and demands of typical practice within test development, today. RTD is a conscious and deliberate attempt to respond to the disparity in status, training and shared knowledgebases between psychometrically oriented professionals and content development professionals.
